At last! A home as unique as you are where traditional elegance meets modern convenience. Nestled in Auburn's coveted Lakeland Hills community, a special neighborhood of homes with distinct personality, this entertainer's dream is far from cookie-cutter! High ceilings on every level amplify the space, creating a sense of grandeur. The main floor's bright and circular floor plan effortlessly blends formal and informal areas. Your large chef's kitchen featuring stainless appliances, gas range and double oven is complemented by beautiful slab granite counters, soft close drawers, and cabinets with convenient organizers. The home office on this level includes a cozy window seat. Down the hall is the powder room and large laundry room with sink and extra storage. On the upper level, retreat to your massive primary suite with vaulted ceilings, 5-piece bath and two walk in closets. Savor your morning coffee on your private deck with valley views. Two additional spacious bedrooms, including one with a walk-in closet, share the hall bath featuring custom tile work. But Wait! There's More! Your fully finished basement provides an additional entertaining area with a wet bar and refrigerator. Two more bedrooms round out this level, including one with an ensuite bath and walk in closet along with another guest bath. In addition to the endless storage in this home, you'll appreciate the two water heaters, central A/C, 3 car garage, and proximity to community trails, parks and play courts!
